

Call for Contact Information to develop a Local Resources Directory

Tlingit Homeland Energy (THELP) has now selected the General Contractor for the civil portions of the work to construct the **Atlin Hydro Expansion Project**.

The civil general contractor is currently working on advancing final design and costing for the project and requires information about local/regional resources available to the project. They will (*subject to permitting approval and advancing into construction in 2022*) require subcontractors, services and supplies which could be provided by local/regional businesses.

In the near future THELP will also be selecting separate general contractors for:

- The 92 km 69 KV Transmission line
- Two substations (Atlin and Jakes Corner)
- Turbine and Generators

To assist the General Contractors with contacting and sourcing the supplies and services they need, THELP is developing a Local Resources Directory, targeting business in the general Atlin region. **If you would like your business or service listed in this directory, please provide contact information and a brief description of the services or supplies you have to offer, in PDF format by February 14, 2022.**

We will summarize and pass all submitted information on to the General Contractors, so they may contact you directly as needed for details, pricing and availability.

Please EMAIL your information to:
Caitlin O'Shea, Community Outreach Coordinator
